

January 13, 2021

Dear Families, Loved Ones and Team Members of Regency at Augusta,

Since our last update, we completed our second round of COVID-19 Antigen testing. Unfortunately, one team member tested positive for COVID-19. This team member last worked in the community on 1/11/2021. All residents' tests were negative and none of them are showing symptoms of COVID-19 currently.

All residents remain on quarantine as we continue to provide the best care possible to keep them healthy and happy.

Our next round of testing will be on Tuesday, January 19, 2021 and we will continue to undergo weekly Covid-19 Antigen testing until we have gone 14 consecutive days without a positive Covid-19 result in our community.

Here is what we are continuing to do to keep our team and residents safe and healthy:

- Social distancing is being practiced
- All residents will have in-room dining
- Multiple daily temperature and pulse oximetry checks for all residents
- Only essential individuals will be allowed to enter our community to provide, essential and compassionate care to those residents
- Frequent disinfecting of our community
- Staff are completing a screening questionnaire and having temperatures checked daily upon entering the community
- Strict adherence to CDC hand washing and hand sanitizer guidelines
- All team members will wear proper PPE while offering care to our residents
- Masks will be provided for residents to wear during care provided by staff

The current visitation restrictions will remain in place until we have gone 14 days without a positive case of Covid-19 within our community, and until the VDH and the local health department lift restrictions. We are continually adjusting policies and practices as set by state and federal officials.

Please reach out to me if you have any questions. On behalf of the team here at Regency, we appreciate all your support during this time.

Best regards,

Vickie Conner
Executive Director
